

QUOTE

FROM ONE OF OUR CUSTOMERS

„For many years we have been working with the delivery of fish from one department to another and we use plastic tubs for this. We had previous experience with other suppliers, but we were not very satisfied with the quality of the material for maintainability. Compared several different suppliers we found out that Borgarplast had the best quality for our needs. We have been using your tubs daily for many months now and I am very pleased that we do not have any problems with them. Tubs do not break, do not crack in the cold, they are easy to repair and convenient to store.“

*Andrejs Mancinskis,
Department leader Fillet department
Austevoll Laksepakkeri AS*

BORGARPLAST has been exporting **Highly-insulated** and **Heavy-duty Containers** since 1986. Our factories are very well equipped with a high production capacity.

BORGARPLAST was founded in 1971 and has always operated in the manufacturing industry, mainly involving products made from synthetics, polyethylene and polystyrene.

BORGARPLAST started production of a new design of fish containers in 1983 and in 1986 a revolutionary new design of highly insulated fish containers was produced and has since then been the preferred choice worldwide.

BORGARPLAST defines itself as a manufacturer of containers and packages for the food industry, especially for the transportation of fresh food.

Highly-insulated containers are perfect for when no cooling equipment is available or in conditions where temperature is either very high or very low.

Heavy-duty Containers are widely recognized as the strongest insulated Plastic Bulk Containers on the market.

BORGARPLAST has over the years earned awards for many aspects of its operations including technological innovation, environmental awareness and employee facilities and safety.

PIONEERS IN HIGH-QUALITY HIGHLY-INSULATED & HEAVY-DUTY FISH, MEAT & POULTRY CONTAINERS

PROTECTING FRESHNESS
AND QUALITY FOR DECADES

MADE IN ICELAND

BORGARPLAST
SINCE 1971

THE DESIGN

THERE ARE REAL REASONS WHY OUR CONTAINERS ARE WIDELY CONSIDERED AS **THE BEST**

STRONG HANDLES
Safe lifting and safe stacking.

ROTATABLE 180° WITH FORKLIFT
Easy to empty tubs/bins using forklifts as you can turn the bin completely over if your forklift has that feature.

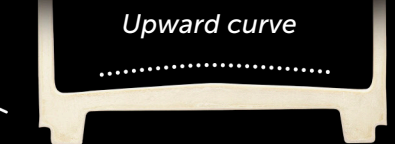

ROUND CORNERS
Easy cleaning inside and outside.

POLYETHYLENE WALLS
Very easy to repair in case of damage.

EXTREMELY RESISTANT AND SHOCK PROOF MATERIAL
Durability and longevity of the tubs/bins.

FOOD GRADE POLYETHYLENE IN ALL OUTER WALLS
Approved for use in food industry be that fish, meat, or poultry.

DRAINAGE ON EITHER BOTH LONG SIDES OR ALL 4 CORNERS
Easy drainage on either model.

CONVEX BOTTOM DESIGN (upward curve)
Prevents bottom of tub/bin from dropping from the weight of contents and moves weight to the corners rather than the middle of the tub. This makes it unnecessary to have the third skid in the middle. Also provides easier drainage.

RIFFLED UNDERSIDE OF BOTTOM
More raw material used to provide extra strength and protection from forklift damage.

COMPLETELY SMOOTH SURFACE OF THE WHOLE TUB
Prevents bacteria from building up on rough surfaces and provides easier cleaning.

STRONG SKID MOUNTS WITH GROOVES
For easier stacking of tubs/bins.

SKIDS DESIGNED FOR ACCESS ON ALL 4 SIDES
Easy to use hand pallet jacks or forklifts from all 4 sides.

THE MATERIAL

THERE ARE REAL REASONS WHY OUR CONTAINERS ARE WIDELY CONSIDERED AS **THE BEST**

High-insulated Containers with Polyurethane insulation (PUR)

Our **PUR** tubs are suitable where high-insulation demands are made. The high-insulated (**PUR**) are lighter than the heavy-duty (**PE**) and therefore preferred where tubs need to be moved manually.

Model	Capacity litres	External dimensions (mm)			Internal dimensions (mm)			Weight kg
		High	With	Length	High	With	Length	
300	255	680	710	910	525	660	855	25.5

* Containers that meet the **ISO 6780** standard.
** Known as "Tuna Container"

Heavy-duty Containers with Polyethylene insulation (PE)

Widely recognised as the **strongest insulated plastic containers** on the market. Preferred where there is a high demand for strength and carrying capacity.
